

Let the QC rock with fantastic features at your disposal.

Adjustable Foot Pressure

You can alter the foot pressure depending on your project. Want less pressure for maneuvering while free motion quilting? Just change the setting. Set it to a lower setting to protect sheer and delicate fabrics.

Bobbin Thread Cutter

Lets you cut your bobbin thread with ease after the bobbin is wound.

Superior Feed System (SFS)

A seven-piece feed dog (pictured) works with the jam-proof rotary hook, foot pressure and automatic tension to give you perfect control and great results every stitch. Start right at the edge of your fabric, or quilt through layers-the SFS handles any job with complete precision.

Auto-Tension System

Switch from sewing on regular fabric to a quilt sandwich with no problem! The QC will automatically set the tension so you achieve perfect stitch consistency on any thickness. A convenient indicator lamp lights up when the Auto-Tension system is in use.

Variable Speed Control

Pick up the pace on straight stitches, take it easy on the curves; the Variable Speed Control lets you adjust the sewing speed to your preference.

Bright Dual Lighting

Lights are positioned at the base of the needle and above the workspace table for better viewing and less eye strain.

Fully Automatic Sensor Buttonholes

Drop your button into the sliding gauge and the foot makes your buttonhole the right size every time. The 10 styles of automatic sensor buttonholes include square, rounded, keyhole, heirloom, knit and welted.

Swing-Open Face Plate for Easy Cleaning

Removing lint and adjusting foot pressure is a cinch.

Top-Loading Full Rotary Hook System

The quiet rotary system is jam-proof and hassle free, and the clear bobbin cover makes it easy to check how much bobbin thread is remaining.

I might be a little bit country, but my quilting machine rocks and rolls.

Marie

JANOME
Marie Osmond
Quilter's Companion

A Quilter's Companion with Memory Craft Power!

Learn first-hand the benefits of using a convenient, feature-rich Janome sewing machine.

The stylishly designed Marie Osmond Quilter's Companion provides excellent versatility including an automatic straight stitch needle plate, an abundance of unsurpassed features and over 200 handy stitch designs.

Edit and save your stitch combinations to five on-board memory banks for easy recall and use in later projects; sew perfect stitches with automatic tension, whether it's decorative stitch smocking on a lightweight dress or straight stitching on a quilt. Whether they're a little bit country or a little bit rock and roll, the QC is the perfect tool to help you fully realize your creative ideas.

One Hand Needle Threader

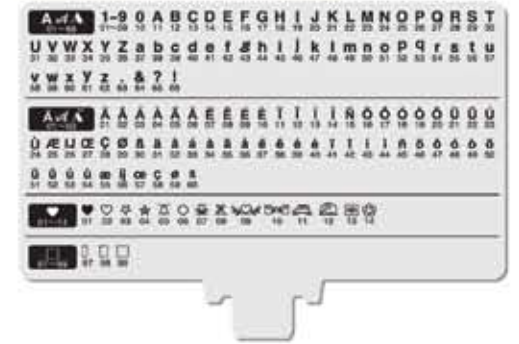

Easy needle threading just got better! The advanced design keeps the lever in place for easy One-Hand threading. Pull the thread across the threader and watch as it is fed through the eye of the needle.

Adjust the length and width, elongate and mirror stitches and combine into patterns.

Five Memory Banks let you store your combined patterns for convenient recall with the simple press of a button.

Customize and Save Your Favorite Stitches

201 utility and decorative stitches, 10 automatic buttonholes, plus three fonts provide options galore! Choose a stitch combination, then edit and save them with the QC's easy editing capability. Adjust the length and width, elongate and mirror stitches, and combine them into patterns. Five Memory Banks let you store your combinations, and then recall them easily at the push of a button.

A Janome Original and Marie's Favorite Feature

Automatic Straight Stitch Needle Plate

No need to change the needle plate for quilt piecing! The QC is ready when you are. Janome's innovative engineering makes it easy to switch between straight stitch and zig zag without switching the needle plate. Simply select straight stitch 1 through 3 and the QC automatically reduces the size of the needle hole. This innovative design is a Janome Original and Marie loves it!

Handy Shortcuts at Your Fingertips

Keep your hands and your eyes close to your project at all times. Shortcut buttons are placed directly above the needle to better assist you during projects. You'll find the memorized needle up/down, locking stitch, and backstitch button conveniently located on the front of the machine. The Start/Stop Button lets you sew without using the foot control – you can even press and hold this button to slow down your stitching for a little extra control.
