

Machine settings:

Stitch: Buttonhole stitch

Thread tension: 1 - 5

Stitch length: 0.5 - 1

Stitch width: 5

Slide the forked sizer to the end of the sliding buttonhole foot . Place the desired size of button between the forked sizer and the black piece to hold the button.

Tighten the screw securely and remove the button. Make a test buttonhole on a sample duplicating the fabric, interfacing and seams of the actual garment. Follow your machine's instructions for completing the buttonhole.
